DETAILED ACTION

Allowable Subject Matter

Claims 3-13, 16, 21, 22, 24, and 26-30 are allowed.

The indicated allowability of claim 15 is withdrawn after further review of the disclosure. The inconvenience to applicant is regretted.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the tether adapted to carry an electrical signal indicating connection of the fastener to an item in a dispenser (claims 15 and 31) comprising a stratified body (claim 23) or carrying separable subtethers (claim 25) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15 and 31 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly

Art Unit: 3677

connected, to make and/or use the invention. It is not known how the tether is adapted to carry an electrical signal indicating connection of the fastener to an item.

Claims 23 and 25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It is not known how the tether is adapted to carry an electrical signal indicating connection of the fastener to an item in a dispenser comprising a stratified body or carrying separable subtethers.
